2025 DONATION FORM

Thank you for donating to the Alberta Cancer Foundation through the 2025 Enbridge Tour Alberta for Cancer.

YOUR DOLLARS AT WORK

MORE HOPE MOVEMENT

By donating to the Alberta Cancer Foundation's More Hope Movement, you ensure that Albertans have access to the support they need and the very latest treatments, now and in the future. You enable us to capitalize on the latest treatment options available and drive the pace of innovation – rather than wait for it to come from someplace else.

Cancer can be an uncertain journey full of twists and turns, but hope is what carries us through the darkest moments. Hope for more time, for better treatments, for compassionate support.

Together, we are building an unstoppable network of Albertans committed to creating more hope and better outcomes for those facing cancer across the province.

More moments. More breakthroughs. More love.
More discoveries. More hugs. More Hope.

PATIENT EXPERIENCE

At the Alberta Cancer Foundation, we are Albertans helping Albertans—Albertans from every community, facing every cancer type, and from every walk of life. As the fundraising partner for every cancer centre in Alberta, we support world-class research and programs that aim to improve the cancer journey for patients facing cancer and their families.

Thanks to our donor support of the Alberta Cancer Foundation's More Hope Movement, we are able to fund programs that focus on patients' unique needs and reducing disparities in cancer treatment and care in underserved populations across Alberta. Programs like the Provincial Patient Navigation Program and the Patient Financial Assistance Program, which help Albertans who, due to geographical, cultural, financial or other barriers, may have trouble accessing appropriate cancer diagnoses, treatments and care. These programs improve the overall patient experience and provide guidance and support to those who need it most.

WORLD CLASS CARE AND RESEARCH

Innovative cancer research is happening all over Alberta and it's helping us better understand cancer — how to reduce the risk of developing the disease, detect it earlier, develop more effective treatments, and improve the quality of life for patients.

Every year, more than 1,000 Albertans participate in cancer-focused research trials — trials with benefits that ultimately help hundreds of thousands of other patients, in our province and around the world.

Cancer research in Alberta has already led to many incredible advancements in our quest to change the course of cancer. These include earlier detection of breast cancer, more personalized and effective treatments through precision oncology, lives extended through CAR-T cell therapy, and countless other novel treatments and discoveries that are significantly improving survival rates of those facing the disease.

By making a gift to the Alberta Cancer Foundation's More Hope Movement, you are funding innovation in detection treatment and care that supports the brightest minds in medical research move discoveries from the lab directly to patients quicker than ever before. Your support is changing the way we prevent, detect and treat cancer and creating more "made-in-Alberta" solutions to the disease.

ALBERTA CANCER CENTRES

From the Canmore mountains to the canola fields in Lloydminster – the Alberta Cancer Foundation supports leading edge treatment, care and research that is making a difference for cancer patients across the province.

As the official fundraising partner for Alberta Health Services cancer centres across the province, we make life better for Albertans facing cancer by supporting world-class research and compassionate patient care, right here in our own backyard.

Last year, over 63,000 patients were cared for at cancer centres across Alberta. As the number of Albertans diagnosed with cancer continues to increase, so does the need to further enhance and expand services available through these centres.

By making a gift to the Alberta Cancer Foundation's More Hope Movement, you help improve the patient experience through new medical equipment, enhanced treatment and care options, and wellness initiatives and specialized training for oncology staff.
